RPS Studio **CooLED 20** Light

The new RPS Studio CooLED 20 is a versatile LED light that can be used in the studio or on a location shoot even if there is no AC power. Producing light equivalent to a 200 watt incandescent photoflood, it provides 5200° daylight. The built in dimmer and compact size (7.25" x 5.5") makes this a very useful light for location or studio work. Powered by either an included AC adapter or 12 "AA" batteries (alkaline or NiMH, not included) this unit will light up a shot whether you have AC power available or not. Complete with yoke style mount with standard accessory foot, 1/4-20 female tap, and locking handle (with 1/4-20 female tap) designed for either left or right hand use.

Included with the RPS Studio CooLED 20 are a two flag barn door, a tungsten filter, a diffusion filter, a nylon pouch to hold both filters, an AC adapter, and a handle.
